I hear and I forget.

I see and I remember.

I do and I understand.

How does “doing” become learning?

Information becomes learning when we **actively work with it.**

If learning is the process of acquiring knowledge, ...

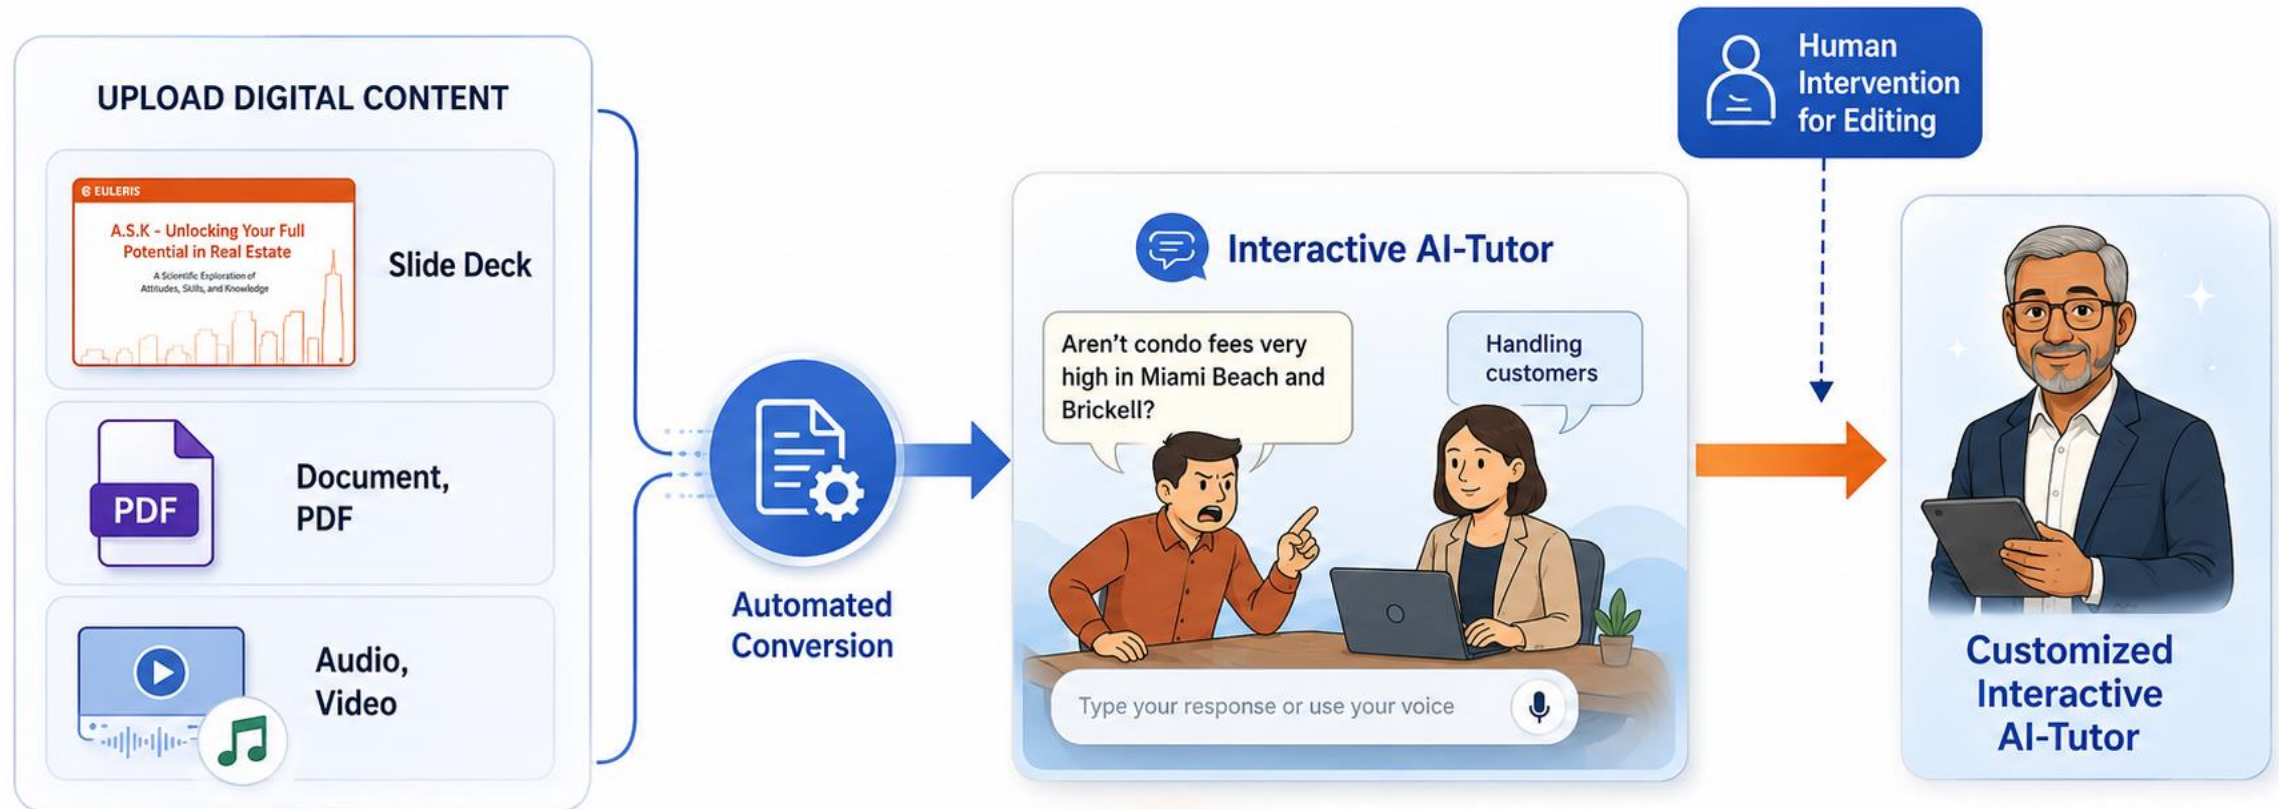

How do we learn best?

Learning = Critical Thinking, Reasoning, Competency

In the age of AI, content is abundant.
The scarce resource is personalized, interactive learning that builds competency.

Digital Content becomes AI Tutor enabling critical thinking

Takeaways

Conversational AI Tutors can trigger

- Engagement and interaction
- Adaptive learning and practice
- Problem-solving and case studies
- Personalization
- Learner profile and qualitative assessments
- Critical thinking and error intelligence

A wooden surface with several puzzle pieces scattered around. Some pieces are already assembled into a larger section in the upper left, showing a blue sky with clouds. Other pieces are loose, some showing a forest scene and one showing a sunset. The text is overlaid on a blue rectangular background.

I hear and I forget.
I see and I remember.
I do and I understand.
I interact and I master.
